

Stick Child's Society for the Statistically Illiterate

Do you suffer from...?

- **Binary Comparison Disorder (BCD)**
- **Target Fixation Syndrome (TFS)**
- **Facts Denial Dysfunction (FDD)**

If you notice any of the following symptoms:

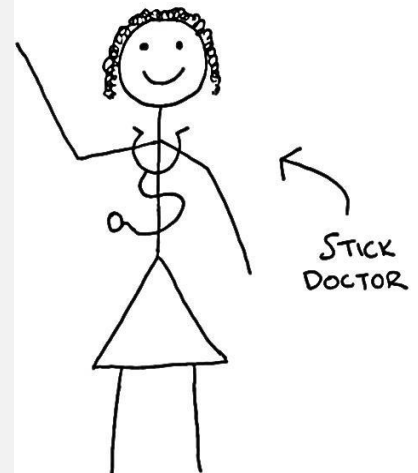

- Comparing things to this time last year
- Plucking numbers from thin air and calling them 'targets'
- Planting your head in the sand when faced with evidence

GET HELP NOW!

Ground-breaking advances mean survival rates are high if these conditions are diagnosed and acted upon quickly.

Established remedies, such as Statistical Process Control treatment, Deming therapy, and simple self-help techniques such as reading *Intelligent Policing* can help overcome these common ailments.

A range of **FREE online resources** (for example, the *InspGuilfoyle blog*) will also help sufferers get back on their feet.

Support groups and experienced professionals are available to help sufferers cope with potential side effects, such as the well-known and hideously painful condition '**reds and greens withdrawal**', as well as the traumatic initial impact of the '**targets void**'.

Get back on the road to recovery with Stick Child and the S.C.S.S.I.
